Neonatal Resuscitation

KEEP BABY WARM
Dry Thoroughly
Remove wet linen
Suction MOUTH THEN NOSE
Provide tactile stimuli (optional)

Resp effort?
Spontaneous

Heart rate?
< 100

Skin color?
Blue
Pink or peripheral cyanosis

Positive Pressure Ventilations BVMask Oxygen 100%

HR < 60
Continue Ventilations
RR < 30
HR increasing?
No
Yes
Discontinue ventilatory assistance when spontaneous ventilations begin

HR 60-100
Continue Ventilations
If HR < 80, Chest Compressions

HR > 100
Watch for spontaneous ventilations

Monitor Closely

KEEP BABY WARM
Monitor LOC, respiratory status, skin color/temp
