

Ice Rescue Technician Advanced

For personnel who operate on frozen, large volume rivers with open leads. This course typically runs 3 days and covers all of the skills taught in Surface Ice Rescue Technician (IRT), as well as addressing the substantially higher-risk environment encountered when working on large volume rivers with open leads. Also covered are size up, risk analysis and hazard mitigation, PPE considerations, self-rescue techniques and throw bagging. Scenario-based training using both standard and improvised ice rescue equipment will be carried out.

This course can also be taught as a one-day upgrade for students who have already completed the Surface Ice Rescue Technician (IRT) course. *Minimum age: 18 years.*
